# Now... no wheat used in beer or ale

*And wheat alone can solve the problem of feeding the world's hungry*

Actually wheat has never been a large item in the brewing process—only $\frac{1}{10,000}$ of the entire U. S. wheat crop was used in 1945.

In accordance with United States Government policy, the brewing industry has used no wheat whatever since March 1, 1946.

**OTHER MATERIALS CUT 30%**

The other grains used have been reduced by 30%—that is, to 70% of the 1945 amount.

Wheat alone can solve the problem of feeding the hungry. The grains to which the industry is now restricted, are of a variety and grade not normally consumed by the people of the world as food.

**LESS BEER AND ALE**

Altogether, the brewing industry is using 30% less materials than in 1945. This results in a proportionately lower production. But since the current demand for beer and ale is about 25% greater than a year ago, the real shortage is nearer 50%.

Consequently, your dealer will not be able to supply you with all the beer and ale you would like. We know you will understand the reason for this.

* * *

Your attention is earnestly directed to the recommendations of President Truman's Famine Emergency Committee, which are summarized in the box below.

This statement tells in clear, simple terms what each of us *individually* can do to help during the emergency.

***What the President's Famine Emergency Committee asks us all to do***

1. **Save and share wheat and fat products** . . . *Go light on all foods that take wheat, fats and oils—save breads, macaroni, cakes, cookies, pastries and deep-fried foods. Use drippings for pan-frying. Save salad oil—use boiled dressings.*
2. **Buy and serve more plentiful foods** . . . *Balance diets with the more plentiful foods, such as potatoes, fresh fruits and vegetables.*
3. **Waste NO food** . . . *Dress up today's leftovers for tomorrow. Make macaroni count with melba toast, crumb-toppings, bread puddings and stuffings. Take no more than you can eat. Clean your plate. Turn in unusable fat salvage promptly.*

### Radar Base Blown Up in Palestine by Saboteurs

JERUSALEM, PALESTINE — Saboteurs recently blew up an RAF radar station on Mount Carmel at Haifa, which has been used to detect ships landing Jews illegally in Palestine.

Jewish extremists were believed responsible for the explosion. Two RAF noncommissioned officers were injured seriously and six other RAF men hurt slightly. The radar station was smashed.

A small group of saboteurs approached the station through an adjacent compound without being observed. They planted the explosive charge and fled while guards opened fire.

Apparently none of the saboteurs was hit.

### Brakeman Thanked for Finding $25,000 in Cash

NEW YORK—John H. Bishop, a railroad brakeman, of Point Pleasant, N. J., picked up an abandoned leather case in Pennsylvania station, turned it in to the lost-and-found department, and then dismissed it from his mind as an unimportant incident.

Later railroad officials summoned Bishop and commended him for his act because the locked case contained $25,000 in cash, jewels, watches and travelers checks.

They belonged to Mrs. Florence Burroughs, wealthy Waldorf Towers resident. The 86-year-old widow forgot the case when she boarded a train to visit her son at Charlottesville, Va.

### Population of Russia Now Is 193,000,000

MOSCOW — G. F. Alexandrov, chief of the propaganda section of the Communist party's central committee, said in a speech that the Soviet union's population now totals 193,000,000. Of this number, he added, 100,000,000 were born after the October revolution in 1917.

### Navy Secret Guarded By Ingenious Device

ALBANY — An ingenious alarm which kept intruders away from the General Electric company's secret "dungeon laboratory," where navy anti-submarine equipment was developed during the war, has been revealed.

Safety regulations prohibited locks being fixed on a wire gate which closed off the basement laboratory from other sections, so a special alarm was devised to give warnings that the gate was being opened.

If anyone other than the engineers who had passkeys to still the alarm opened the gate, a large horn sounded a deafening blast within a few feet from the ear of the intruder.

Bowles orders increase in milk subsidy.

From where I sit ... *by* Joe Marsh

**Mat Fisher versus Ed's Big Toe**

[illegible]at Fisher's our local weather [illegible]... and planning for the picnic of our town Improvement Club, I persuades us to postpone it till Tuesday—since it's going to rain for three days, starting Saturday the 8th.

But Ed Whortle claims he can tell rain in his big toe—and he says there isn't a drop in prospect for at least three days!

Well, it's bright and sunny on the 8th—and 9th—and 10th. But on the day of the picnic, it pours rain like Jupiter Pluvius—and we hold it in Ma Hoskins' parlor, drinking beer and roasting hot dogs.

Of course, Ed razzes Mat no end. But nobody's sore. In fact, [illegible] Mat just a little better, being an expert and being wrong. (Anyhow, where I sit, a stormy day indicates before a fire makes a hot dog and a glass of beer extra appetizing!)

### Change in Japs Is Noted by Experts

*Ruin Caused by War in Japan Brings New Spirit.*

PEARL HARBOR, H. I. —The tremendous physical devastation wrought in Japan by war has been matched by the spiritual upheaval of the people Sir George Sansom, British member of the far eastern commission, said.

Sansom, prewar counselor of the British embassy in Tokyo and an authority on Japan, said the Japanese people feel they were deceived about the war.

"They don't have the same trust in government as before," Sansom said. He added, however, that this disillusionment had nothing to do with the emperor, but applied to civil and military authority.

The emperor's denial of divinity was generally well received by the people, he said, although some were puzzled. He remarked that it was his impression in prewar years that the Japanese as a whole never believed in the divinity of the emperor, but revered him as a symbol of their government.

Sansom said that Japanese unrest had not crystallized as yet, the people being too preoccupied with problems of food and housing.

"When those needs are satisfied they'll begin to think about politics," he asserted.

He said it was impossible to tell what parties or type of government the people might favor, pending the outcome of the first postwar general election next month, but added:

"Thinking Japanese feel that the most sane type of govern.nent is a constitutional monarchy on the lines of the British system."

Under such a monarchy, he said, the emperor would have little power but would be able to exercise "a certain moral leadership."

### Tells How Guards Drove Prisoners Over Cliff

NUERNBERG. — A Mauthausen concentration camp guard told the war crimes tribunal that he saw eight prisoners hurl themselves over a 135-foot quarry cliff while SS men lashed them.

The SS guards called this "playing paratrooper," he said.

The witness was Alois Hoellriegel, a 36-year-old Austrian barber. He said he watched from a guard tower in 1941 while two SS men herded the prisoners toward the cliff.

"They beat the prisoners until the prisoners threw themselves over the cliff in desperation," he asserted.

Hoellriegel said he assumed such cliff-jumping incidents had occurred "a thousand times." He knew for certain they had happened several times and presumed that the Nazi leaders knew about it.

Hoellriegel testified that Ernest Kaltenbrunner and Baldur von Schirach, two of the defendants, visited Mauthausen and were familiar with conditions there. He pointed a finger dramatically at Schirach in the defendants' box. Schirach removed his dark glasses and nodded curtly.

### Report Power of A-Bomb Is Now Thousandfold

SAN FRANCISCO. — Charles E. Moore, San Francisco industrialist, said General MacArthur had told him in Tokyo that America is equipped with atomic bombs equivalent to 20 million tons of TNT or a thousand times more powerful than the one dropped on Hiroshima.

Moore, in a talk before the Commonwealth club, related his conversation with MacArthur in the general's Tokyo headquarters as follows:

"The general said warfare is no longer warfare—it is a question of civilization. This is what he said with no restrictions as to secrecy. 'The finest explosive in the world is our TNT, but that bomb dropped on Hiroshima was equal to 20,000 tons of TNT. It is already obsolete. We are now ready with one that is equal to 20 million tons of TNT.'"

### Inhalation of Aluminum Dust Relieves Silicosis

DENVER. — Relief from silicosis has been afforded by use of aluminum dust inhaled into the lungs. Researchers said the new treatment may lead to prevention [illegible] disease.

The Colorado university school of medicine announced that treatments it was conducting gave relief to those who have contracted the disease by breathing air contaminated with rock dust containing silica.

Researchers said the treatment relieved symptoms of the disease, permitting patients to breathe in comfort, but did not effect a cure.

### Red Command to Get Jeweled, Gold Swords

MOSCOW. — Master jewelers of Russia have been commissioned to make gold plated swords of the finest Ural steel, adorned with 200 precious stones, for the Red army high command, Ivan Suvorov, who assembled a map of the USSR in precious stones for the world's fair in Paris, is in charge of the work.

Mrs. Ella S. Anderson, Home Demonstration Agent

Home Demonstration Agent's [illegible] dule, week of April 22-27.

Monday, April 22.- An all-day meeting of the Trinity Home Demonstration Club will be held in the home of Mrs. Joe Martin, from 10 A. M to 3:30 P. M. Demonstrations: Short Cuts to House Cleaning, Consumer Problems and Buying House Furnishings. Members please bring lunch.

Tuesday, April 23.- District Federation meeting at Buckingham Central High School, 10 A. M.

**NEGRO EXTENSION NEWS**

The ayent was proud of the [illegible]ning made by Appomattox County at the recent meeting of the State Farmers Conference at Virginia State College. Appomattox was represented by fifty farmers and their wives, placing this county third with relation to the number present from all the larger counties in the state.

The program consisted of such speakers as: Mr. L. B. Dietrick, Director of Extension Service; Mr. L. M. Walker, Commissioner of Agriculture for Virginia; Dr. Foster, President of Va. State College; Mr. Ross Newsome, State Agent of Extension Service; State Superintendent of Schools, Mr. Lancaster, and others.

Demonstration and judging contests were held on dairy cattle, hogs, mules and poultry.

### $62,800 Veterans Are Getting Jobless Pay

WASHINGTON. — The number of veterans receiving unemployment payments under the G.I. Bill of Rights swept upward to 962,800 for the week ending February 2. The previous week the number was 840,743.

The amount paid reached $23,833,635, up from $20,826,262.

### X-Ray Device Aids Fight Against TB

*Designed to Speed Clinical Chest Examinations.*

NEW YORK — A new x-ray device, designed to speed up clinical chest examinations on an economical basis, has been announced.

Termed a definite aid in the nation's fight to curb tuberculosis and other chest defects, the new device was developed by Powers X-Ray products of Glen Cove, N. Y. in cooperation with the New York City department of health.

Early models of the roll paper magazine cassette, as the device is known, have been used in New York City clinics over an experimental period of two years.

Commenting on the new unit, Dr. Herbert R. Edwards, director of tuberculosis of New York City's health department, and Aaron Siegel, chief technician, jointly said: "There finally has been developed a model that incorporates several unique features that provide a roentgenogram superior in quality to previous methods, speed of action, increased volume of service and definite savings both in capital outlay and in day-by-day operation. The diagnostic quality of the film is excellent."

The magazine cassette, as now developed, is a smaller portable version of the original cassette developed by the Powers company. But this new compact unit also features a full-sized x-ray taken on a perforated paper roll of 50 "exposures," and it is geared to accommodate as many as 300 or more radiographs in a single day, depending upon technical and clerical personnel.

State may adopt metal dog tag.

Attend Church Easter Sunday.
